

ยาที่ไม่สามารถให้ร่วมกันทาง IV ROUTE

เฉพาะรายการยาที่มีในบัญชียาของโรงพยาบาลเจ็ดเสมียน

รายการยา	IV incompatibility
Adenosine inj.	-
Adrenaline inj.	Additive: Sodium bicarbonate inj. Y-site: Ampicillin inj.
Amiodarone HCl inj.	Y-site: Ceftazidime inj., Furosemide inj., Sodium bicarbonate inj.
Ampicillin sodium inj.	Solution: สารละลายที่มี dextrose, Ringer's solution, Sodium bicarbonate inj. Additive: Clindamycin inj., Dopamine inj., Gentamicin inj., Hydrocortisone inj. Syringe: Gentamicin inj., Metoclopramide inj. Y-site: Adrenaline inj., Calcium gluconate inj., Nicardipine inj.
Atropine sulfate inj.	-
Calcium gluconate inj.	Syringe: Metoclopramide inj. Y-site: Ampicillin inj., Clindamycin inj., Sodium bicarbonate inj.
Ceftazidime inj.	Additive: Gentamicin inj. Y-site: Amiodarone inj., Nicardipine (incompatible at ceftazidime 125 mg/ml but compatible at ceftazidime 10 mg/ml)
Ceftriaxone sodium inj.	Additive: Clindamycin inj., Metronidazole (at metronidazole 15 g/l with ceftriaxone 20 g/l; compatible at metronidazole 7.5 g/l with ceftriaxone 10 g/l) General: Calcium-containing drugs
Chlorpheniramine maleate inj.	-
Clindamycin inj.	Additive: Ampicillin inj., Ceftriaxone inj., Calcium gluconate inj., Magnesium sulfate inj.
Cloxacillin inj.	Gentamicin inj.
Dexamethasone inj.	-
Diazepam inj.	Additive: Furosemide inj. Y-site: Hydrocortisone inj., Potassium chloride inj.

รายการยา	IV incompatibility
Diclofenac sodium inj.	-
Dimenhydrinate inj.	-
Dopamine inj.	Additive: Ampicillin inj., Gentamicin inj., Metronidazole inj., Sodium bicarbonate inj. Y-site: Furosemide inj.
Furosemide inj.	Additive: Amiodarone inj. (at high concentrations of both drugs), Diazepam inj., Gentamicin inj., Hydrocortisone inj., Metoclopramide inj., Pethidine HCl inj. Syringe: Metoclopramide inj. Y-site: Amiodarone inj., (incompatible at furosemide 10 mg/ml; possibly compatible at 1 mg/ml), Dopamine inj., Gentamicin inj., Metoclopramide inj., Morphine inj., Nicardipine inj.
Gentamicin inj.	Additive: Ampicillin inj., Ceftazidime inj., Cloxacillin inj., Dopamine inj., Furosemide inj. Syringe: Ampicillin inj. Y-site: Furosemide inj.
Haloperidol inj.	Syringe: Morphine sulfate inj.
Hydrocortisone inj.	Additive: Ampicillin inj., Furosemide inj. Y-site: Diazepam inj.
Hyoscine- <i>n</i> -butylbromide inj.	-
Magnesium sulfate inj.	Additive: Sodium bicarbonate inj. Y-site: Clindamycin inj.
Methylergonovine maleate inj.	-
Metoclopramide inj.	Solution: D5W (at high drug concentration) Additive: Furosemide inj. Syringe: Ampicillin inj., Calcium gluconate inj., Furosemide inj., Sodium bicarbonate inj. Y-site: Furosemide inj.

รายการยา	IV incompatibility
Metronidazole inj.	Additive: Dopamine inj., Ceftriaxone inj. (at metronidazole 15 g/l with ceftriaxone 20 g/l; compatible at metronidazole 7.5 g/l with ceftriaxone 10 g/l)
Morphine sulfate inj.	Additive: Sodium bicarbonate inj., Pethidine HCl inj. Syringe: Haloperidol inj., Pethidine HCl inj. Y-site: Furosemide inj.
Naloxone HCl inj.	-
Nicardipine inj.	Y-site: Ampicillin inj., Ceftazidime inj. (incompatible at ceftazidime 125 mg/ml but compatible at ceftazidime 10 mg/ml), Furosemide inj.
Norepinephrine inj.	Additive: Sodium bicarbonate inj.
Omeprazole inj.	-
Oxytocin inj.	-
Pethidine HCl inj.	Additive: Furosemide inj., Morphine inj., Sodium bicarbonate inj. Syringe: Morphine inj.
Potassium chloride inj.	Y-site: Diazepam inj.
Sodium bicarbonate inj.	Additive: Dopamine inj., Adrenaline inj., Morphine inj., Pethidine HCl inj., Norepinephrine inj., Magnesium sulfate inj. Syringe: Metoclopramide inj. Y-site: Amiodarone inj., Calcium gluconate inj.
Terbutaline sulfate inj.	-
Tramadol HCl inj	-
Vitamin K1 inj.	-
